

Trail Book

The book **14 Shorter Trail Walks In and Around Newcastle** by NT member Eva Lundahl is now available from **Amazon**. The book includes detailed trail maps, local history and geology, and the delights of each walk: plants and animals; historic sites and artifacts; views, waterfalls, and moss-covered boulders. There are expert photos of all these things, and even an index. Eva is donating the proceeds to Newcastle Trails; buying the book via this website increases the share of the price going to NT.

Reader's Reviews:

Hey Eva, just finished your book and I am totally in awe with what you have portrayed between these pages. I feel ashamed that I live within this community and never took the time to fully comprehend the fabulous history of the town.

You captured not only the trails in the vicinity which are marvelous in themselves, but you also captured through photographs the essence and meaning of how much the coal industry played a factor in the development of the Puget Sound region.

Sincere kudos to you and your support team!

*—Jim,
Newcastle*
